3.1	Set goals based on	potential impact con	nsiderations				
	Success Criterion						

	Explicit goals that impact the environment and performance of the service, for example, HTTP requests, or the amount of DOM elements that need to be rendered are both set and met.					
	Because the payload being delivered may not always be equal in terms of energy intensity, operators of websites and applications must ensure that consideration is given for the energy intensity (or unit being evaluated) of each component. For example, non-rendering text is less computational than CSS, which in turn is less process-heavy than JavaScript, which is less resource-heavy than WebGL.					
	Impact & Effort	Med	lium	Med	lium	
	GRI	Medium	Medium	Medium	Medium	
3.2	Remove unnecessa	ary or redundant info	rmation

	Success Criterion				
	To assess the environmental impacts of hosting and detect overconsumption, some indicators are monitored: energy / water usage, CPU / Memory usage, allocation of servers and CPU cores, etc. These indicators are be used to calculate metrics directly related to environmental impacts, such as Power Usage Effectiveness (PUE), Water Usage Effectiveness (WUE), and Carbon Usage Effectiveness (CUE). They are displayed to visitors for transparency and monitoring reasons. If possible (to reduce redundancy) the ability to scale packages based on usage requirements is made available (manually or automatically) to reduce wasted resources.				
	Equipment is managed responsibly by keeping it as long as possible, using it as efficiently as possible, making sure it is certified, and purchasing long-lifespan products.				
	Waste (including eq	uipment) is recovere	ed, recycled, and up	cycled.	
	Electricity comes entirely from sources with the lowest possible carbon intensity (ideally generated by wind or solar rather than from non-renewable sources). For example, Renewable Energy Credits (RECs) can help verify the source, or, ideally, prove that electricity comes directly from renewable sources.				
	reduce them and or sustainable, therefo environmentally vial	nly compensate for to the effectiveness	hem if they cannot be of an offset solution and part of a longer	at the priority should be avoided. Carbon of must be verified, sh t-term strategy to elin	credits may not be own to be both

5.23	Include responsible financial policies								
	Success Criterion								
	The organization has divested from fossil fuels and moved its banking, sponsorship, and other affiliations to more responsible partners.								
	The organization engages in flexible financing and responsible budgeting for its digital products and services to accommodate long-term care and maintenance.								
	Impact & Effort	High		High					
	GRI	High	High	High	High				
5.24	Include organizational philanthropy policies								
	Success Criterion								
	The organization has a clear corporate giving policy and creates philanthropic partnerships with strategically aligned organizations.								
	The organization engages in free or volunteer projects, which help its team learn new tools and tactics, while also helping charities and non-profit organizations build capacity.								
	Impact & Effort	High		Medium					
	GRI	High	High	High	High				
5.25	Plan for a digital product or service's care and end-of-life								
	Success Criterion								
	Clear, documented end-of-life guidelines exist that include data disposal, archiving, file deletion, etc guidance.								
	Impact & Effort	Medium		Medium					
	GRI	Medium	Medium	Medium	Medium				
5.26	Include e-waste, right-to-repair, and recycling policies								
	Success Criterion								
	The organization has specific policies in place to recycle e-waste and repair owned technology products whenever possible.								
	The organization has formed relationships with local partners for e-waste recycling and repair.								
	The organization buys refurbished equipment whenever possible.								
	The organization allows consumers to repair (to the best of their ability) the consumables they purchase, offering (if possible at cost) replacement components and provides clear instructions to resolve faults that occur.								
	Impact & Effort	High		Medium					
	GRI	High	High	High	High				
5.27	Define performance and environmental budgets								
	Success Criterion								

	The product team has defined, baselined, and documented clear sustainability and environmental budget criteria that cover the page, user-journey, and digital service levels and metrics (such as a CO2.js score) that are approved by relevant product stakeholders.							
	Tools such as a performance budget exist to determine the maximum size (goals) your app or website can weigh to reduce the data transfer and HTTP request impact (using metrics like Google Lighthouse).							
	KPIs are defined around engineering hours, development time, or sprints keeping the health and wellbeing of your workers paramount. Consideration has been taken around optimizing your workflow sustainably to allow all tasks to be performed with care.							
	The product team can measurably show how much the budgeting process improved performance and reduced emissions.							
	The product team invests in resources to build capacity and maintain the budgets over time.							
	Impact & Effort	Medium		Medium				
	GRI	Medium	Medium	Medium	Medium			
5.28	Use open source where possible							
	Success Criterion							
	The organization has a clear open source policy in place that outlines how it uses open source tools and the practices it supports surrounding open source development.							
	The organization has a track record of collaboration and community-building around open source principles.							
	The organization regularly contributes to open source community-based projects.							
	Impact & Effort	High		High				
	GRI	Medium	Medium	Medium	Medium			
5.29	Create a business continuity and disaster recovery plan							
	Success Criterion							
	The organization has created a plan of action that is regularly reviewed and occasionally tested to determine readiness in case of an incident and has procedures to quickly recover from such issues.							
	The organization regularly maintains transparent communication with its audience regarding issues that may affect service delivery or user data.
